

Mohammed Yasser Ismael

DATA SCIENCE STUDENT

Giza, Egypt | +20 1141677525 | mohammedyasserismael@gmail.com | [LinkedIn](#) | [Portfolio](#)

About Me

Data science student skilled in Python, SQL, and Power BI, with hands-on experience in data analysis, visualization, and machine learning. Passionate about extracting actionable insights from real-world datasets to support data-driven decision making.

Education

Faculty of Computers & Artificial Intelligence - Cairo University

2023 – 2027

- GPA: Very Good

Skills

Technical Skills:

- **Python** (Pandas, NumPy, Scikit-learn, Matplotlib)
- **SQL** (PostgreSQL, MySQL, SQL Server)
- **Data Analysis & Visualization** (Power BI, Excel)
- **Machine Learning** (Regression, Classification, Clustering, Feature Engineering)
- **Deep Learning** (TensorFlow, PyTorch, Hugging Face)
- **Tools** (Github, Streamlit)

Soft Skills:

- Time Management
- Team Collaboration
- Critical Thinking
- Adaptability
- Problem Solving

Work Experience

Data Analyst Intern – Elevvo Pathways

Sep 2025 – Oct 2025

- Cleaned, analyzed, and visualized 4 datasets using Python and Excel, delivering business insights through interactive dashboards.

Data Analyst Intern – Uneeq Interns

Oct 2025

- Analyzed 3 business datasets using Python, uncovering trends and actionable insights through data cleaning and exploratory analysis.

Projects

Loan Defaulter Prediction System (Graduation Project – Digital Egypt Pioneers Initiative)

- Led a team of 5 in developing an end-to-end loan default prediction system using 350K+ customer records and 150 features.
- Performed data preprocessing, feature engineering, class imbalance handling (SMOTE), and model development.
- Evaluated LightGBM, CatBoost, and Random Forest models, with LightGBM achieving the best performance.
- Deployed the final model as a web application for real-time credit risk assessment.

Energy Consumption Forecasting System

- Built a time-series forecasting pipeline using historical energy consumption data from 8 utility companies.
- Engineered temporal and lag-based features and trained an XGBoost model achieving $R^2 \approx 0.999$.
- Implemented recursive forecasting for future energy demand prediction.
- Deployed the solution as an interactive Streamlit application.

Supply Chain Latency & Risk Prediction

- Developed a machine learning pipeline on 180K+ shipment records to predict delivery outcomes across four classes.
- Applied dimensionality reduction and clustering techniques (PCA, UMAP, K-Means) for exploratory analysis.
- Addressed severe class imbalance using SMOTE and undersampling techniques.
- Tuned XGBoost and LightGBM models, achieving 73.7% accuracy and 0.85 F1-score for late-delivery prediction.

Business Insights & Executive Report for Olist

- Analyzed a multi-table e-commerce dataset covering customers, products, sellers, and orders.
- Evaluated customer behavior, product performance, and seller efficiency using Python and Excel.
- Delivered an executive-level business report with actionable recommendations to improve sales performance.

Flights Delay & Cancellation Analysis

- Analyzed a large-scale U.S. aviation dataset containing 5.5M+ flight records.
- Conducted data cleaning, exploratory analysis, and visualization to identify major causes of delays and cancellations.
- Uncovered seasonal trends and operational patterns to support data-driven decision making.

Courses

Data Scientist (Round 3) - Digital Egypt Pioneers Initiative

IBM AI Engineering Professional Certificate - IBM

Machine Learning Specialization – DeepLearning.AI

Data Scientist in Python – DataCamp

Data Analyst in SQL – DataCamp

Data Analyst in PowerBI – DataCamp
